Product Description

Product Description:

Our Thermal Label comes with a Permanent adhesive type that ensures that your labels are long-lasting and stay in place for a long time. The adhesive is strong and versatile, making it suitable for labeling various surfaces, including paper, plastic, and metal. This feature ensures that your labels remain in place, even when exposed to extreme temperatures, moisture, and other environmental factors. Our Thermal Label is a lightweight and efficient label, which makes it an ideal option for shipping. It is designed to be easy to handle and apply, which saves time and effort. This label is also compatible with most thermal printers, ensuring that you can print your labels quickly and efficiently.

Our Thermal Label is available in various sizes, making it suitable for different labeling needs. Whether you need small labels for your product packaging or larger labels for your shipping needs, we have got you covered. Our Thermal Label is available in rolls or sheets, allowing you to choose the most suitable option for your labeling needs.

Our Thermal Label is an ideal option for labeling needs that require long-lasting labels that can withstand harsh environmental conditions. It is also a lightweight and efficient label, making it an ideal option for shipping needs. Whether you need small or large labels, our Thermal Label is available in various sizes to meet your labeling needs. Choose our Thermal Label for your labeling needs and experience the convenience and efficiency that it offers.

Features:

Product Name: Thermal Label

Applications:

The Hanbu Thermal Label product is a high-quality label that is made in China with certifications such as ISO9001, ROHS, and CE. These certifications ensure that the product is safe, reliable, and durable for all its applications. The minimum order quantity for this product is 2 and it is packaged in plastic bag packages, making it easy to transport and handle. Delivery time is between 4-8 working days, and payment options include L/C, T/T, Western Union, and MoneyGram.

The Hanbu Thermal Label product is a versatile product that is suitable for various occasions and scenarios. One of the most common applications of this product is in shipping. The Thermal Shipping Label is designed to withstand the harsh conditions of shipping, ensuring that the labels remain legible and readable throughout the journey. These labels are also recyclable, making them an eco-friendly option for businesses that are focused on sustainability.

The Hanbu Thermal Label is also ideal for inventory management. The labels are lightweight and efficient, making them easy to apply to products and packages. The labels can be used to track inventory levels, monitor expiration dates, and manage product movement throughout the supply chain.

The Hanbu Thermal Label is also suitable for barcode labels. The labels can be customized to include barcodes, making them an essential tool for businesses that need to track products and packages. The labels can be used to improve the efficiency of processes such as inventory management, shipping, and order fulfillment.

The Hanbu Thermal Label product is a reliable and durable label that can withstand temperatures ranging from -20°C to 80°C. The labels are available in white and custom colors, making them suitable for a range of applications. The product also comes with certifications such as FDA, RoHS, and REACH, ensuring that it is safe for use in different industries and applications.
