## Applications:

The Hanbu Thermal Label Sticker is a versatile product that can be used in various occasions and scenarios. This product is made in China and has been certified with ISO9001, ROHS, and CE. The minimum order quantity is 2 rolls, and each roll is packaged with a plastic bag. Delivery time is around 4-8 working days, and payment terms include L/C, T/T, Western Union, and MoneyGram. One of the key attributes of the Hanbu Thermal Label Sticker is its compatibility with various thermal printers and systems. This makes it an ideal choice for businesses that have different types of printers and systems. Moreover, the labels are fade-resistant, smudge-proof, and moisture-resistant, which ensures that they remain in good condition for a longer period of time. This makes them ideal for long-lasting labels that need to be durable and withstand harsh environments.

The Hanbu Thermal Label Sticker is available in various sizes, which makes it easy to find the right size for your labeling needs. The product is also waterproof, which means that it can be used in environments where there is a lot of moisture. This makes it perfect for labeling products that may come into contact with water or other liquids.

The Hanbu Thermal Label Sticker uses direct thermal printing technology, which means that it does not require ink or toner. This makes it a cost-effective option for businesses that need to print large volumes of labels. The adhesive used in the product is also thermal, which means that it is activated by heat. This ensures that the label sticks firmly to the surface and is not easily removed.

The Hanbu Thermal Label Sticker can be used in various occasions and scenarios such as in the food and beverage industry, retail industry, logistics industry, and healthcare industry. In the food and beverage industry, the product can be used to label products such as bottles, jars, and cans. In the retail industry, the product can be used to label items such as clothing, shoes, and accessories. In the logistics industry, the product can be used to label packages and boxes. In the healthcare industry, the product can be used to label medical equipment and supplies.
