Product Description

Temperature Resistant Thermal Transfer Printable Labels

Product Description:

Our Custom Heat Transfer labels are available in a variety of sizes, including customizable options to ensure that your labeling needs are met. With our state-of-the-art printing technology, you can print high-quality text, barcodes, and graphics on these labels to meet your specific requirements.

The surface finish of our Thermal Barcode Labels is glossy, providing a professional and polished look to your products. The glossy finish also enhances the visibility of your labels, making them easier to read and identify.

Our Thermal Transfer Labels are designed to withstand extreme temperatures, with a temperature range of -20°C to 80°C. This makes them suitable for use in a variety of environments, including cold storage facilities, outdoor settings, and industrial applications.

The adhesive type used in our Clear Heat Transfer labels is permanent, ensuring that your labels stay in place and remain readable for the life of your product. This adhesive is also resistant to water, oil, and other common substances, ensuring that your labels remain legible, even in harsh environments.

Whether you need labels for inventory management, shipping, or product identification, our Thermal Transfer Labels are the perfect solution. With their customizable sizes, high-quality printing technology, glossy surface finish, wide temperature range, and permanent adhesive type, you can be assured that your labeling needs will be met with our Thermal Transfer Labels.

Features:

Product Name: Thermal Transfer Label  
Liner Type: Glassine  
Resistance: Waterproof  
Compatibility: Thermal Transfer  
Surface Finish: Glossy  
Packaging Type: Roll

This Thermal Transfer Label is perfect for printing clear, high-quality labels with a glossy surface finish. It is resistant to water, making it ideal for use in environments where moisture may be present. The label is compatible with thermal transfer printers and has a glassine liner type. It comes in a convenient roll packaging type, making it easy to use and store. This label is also known as a Hot Stamping Label or Clear Heat Transfer label.
