Waterproof 4x6 Direct Thermal Sticker Paper Thermal Transfer Printing Labels Blank Shipping Label

Product Description:

Our thermal transfer labels are made using advanced printing technology that ensures a clear and crisp image every time. The heat transfer label is designed to be long-lasting, meaning that it will withstand the rigors of daily use without fading or peeling. Whether you need transfer printing stickers for product labeling or shipping, our thermal transfer labels are up to the task.

One of the standout features of our thermal transfer labels is their glossy surface finish. This finish not only looks great but also serves a practical purpose - it makes the labels resistant to water and other liquids. This is particularly important for businesses that need to label products that will be exposed to moisture or other harsh conditions.

Another key attribute of our thermal transfer labels is their liner type. Our labels use a glassine liner, which is a high-quality, non-stick material that ensures easy application and removal. This liner type is also resistant to tearing or ripping, ensuring that your labels remain intact and legible no matter what.

At our thermal label manufacturing facility, we use only the best materials and techniques to produce labels that meet the highest standards of quality. Our labels are designed to be compatible with a wide range of printers, making them a versatile and cost-effective option for businesses of all sizes.

In summary, if you're looking for a durable, long-lasting, and waterproof label that looks great and can withstand harsh conditions, our thermal transfer labels are the perfect choice. With their advanced printing technology, glossy surface finish, and glassine liner type, our labels are a cut above the rest. Contact us today to learn more about our thermal label manufacturing process and how we can help meet your labeling needs.

Features:

- Product Name: Thermal Transfer Label
- Chemical Resistance: Resistant To Solvents
- Packaging Type: Roll
- Color: White
- Label Size: Customizable
- Liner Type: Glassine
- Thermal Transfer Labels are also known as Heat Transfer Labels or Heat-sensitive labels. They are designed for Heat Transfer Printing.

Technical Parameters:

Printing Technology	Thermal Transfer
Chemical Resistance	Resistant To Solvents

The Hanbu Thermal Transfer Label is a popular choice for businesses of all sizes that require high-quality, durable labels that are resistant to water and other environmental factors. The labels are made with high-temperature adhesive, making them suitable for use in various settings and surfaces.

The glossy surface finish of the labels makes them ideal for printing high-quality images and text with a sharp, professional look. The liner type is glassine, which provides excellent protection and durability, making the labels resistant to tearing and damage. The packaging type is a roll, making it easy to dispense and use.

The Hanbu Thermal Transfer Label is an excellent choice for businesses and individuals who require high-quality heat transfer labels, high temperature adhesive labels, or transfer printing stickers. The product is available in white color, and the delivery time is 4-8 working days, depending on the order size and destination. Payment terms accepted include L/C, T/T, Western Union, and MoneyGram.
