Product Description

Product Description:

Equipped with NFC capabilities, the HB-P11 supports ISO/IEC 14443 Type A/B and Mifare 1 protocols. This allows for easy and secure contactless payments, making transactions quick and hassle-free.

The HB-P11 also features USB 2.0(OTG) connectivity, allowing for seamless integration with a variety of peripherals such as barcode scanners, printers, and more. This ensures that your business can operate smoothly and efficiently.

Powered by a 4 Core RK3562*2.0GHz processor, the HB-P11 delivers lightning-fast performance, allowing for quick and efficient processing of transactions.

Rest assured that the HB-P11 meets all necessary certification standards, including CE and 3CV. This ensures that your business is compliant with all necessary regulations and can operate with peace of mind.

In summary, the HB-P11 is the perfect solution for businesses in need of a reliable and efficient All In One POS device. With its NFC capabilities, USB connectivity, powerful processor, and necessary certifications, it is the perfect addition to any commercial setting.

Processor	4 Core RK3562*2.0GHz
Connectivity	WiFi, Bluetooth,NFC

Applications:

The Hanbu P11 tablet POS product is a versatile and reliable Android POS PC designed for a wide variety of businesses and industries. With its powerful hardware and flexible software capabilities, the P11 can be used in a multitude of applications and scenarios, making it a valuable asset for any business looking to streamline and simplify their operations.

One of the most popular applications for the Hanbu P11 is as a desktop tablet for retail and hospitality businesses. With its large, high-resolution touchscreen display and powerful processing capabilities, the P11 is perfect for use as a point-of-sale machine for restaurants, cafes, bars, and retail stores. The capacitive ten-point touch screen ensures that users can interact with the device quickly and easily, while the built-in WiFi, Bluetooth, and NFC connectivity options allow for seamless integration with other devices and systems.

Another common scenario for the Hanbu P11 is as an Android POS machine for mobile sales and service businesses. With its slim and lightweight design, the P11 is easy to carry and use on the go, making it an ideal solution for food trucks, pop-up shops, and other mobile businesses. The 2.4G/5G 802.11 A/b/g/n WIFI module ensures that the device can connect to the internet and other devices quickly and easily, while the USB 2.0(OTG) port allows for the use of external devices such as barcode scanners and card readers.

In addition to its applications as a desktop tablet and mobile POS machine, the Hanbu P11 can also be used in a variety of other scenarios, such as in warehouses and factories for inventory management and tracking, in healthcare settings for patient care and record-keeping, and in education and training environments for interactive presentations and demonstrations. With its CE, ROHS, and CE/3CV certifications, the P11 is built to meet the highest standards of quality and safety, ensuring that it can be used with confidence in any setting.

Whether you are looking for a versatile and reliable Android POS PC for your retail or hospitality business, or a powerful and flexible tablet for mobile sales and service, the Hanbu P11 is an excellent choice. With a minimum order quantity of just one and delivery times of 5-7 days, it is easy to get started with the P11 and start enjoying the benefits of its powerful hardware and software capabilities.
