Product Description:

One of the standout features of this Android POS System is its big screen display. The Customer Display is 2.4 inches and has a resolution of 320 x 240, making it easy for customers to view their transaction details. This feature is particularly useful for businesses that require their customers to sign off on transactions or to verify the details of their purchase.

Another feature that sets this Handheld POS Machine apart is its TMS (Terminal Management System). This system allows businesses to remotely manage and update their POS devices, ensuring that they are always up-to-date and secure. This feature is particularly useful for businesses that have multiple locations or that require their employees to use POS devices on the go.

In addition to its TMS system, this Android POS System is also Google Play Store supported. This means that businesses can easily download and install a wide range of apps that can help them manage their sales transactions and streamline their operations. With access to the Google Play Store, businesses can customize their POS devices to meet their specific needs and preferences.

Finally, this Handheld POS Machine comes equipped with WiFi capabilities. It supports both 2.4GHz and 5GHz IEEE 802.11 a/b/g/n/ac, ensuring that businesses can connect to a wide range of networks and access the internet quickly and easily. This feature is particularly useful for businesses that require their employees to use POS devices on the go or that need to process transactions quickly.

In conclusion, the Android POS Portable Handheld Terminal is a must-have for businesses that are looking for a reliable and efficient way to manage their sales transactions. With its big screen display, TMS system, Google Play Store support, and WiFi capabilities, this Handheld POS Machine is designed to meet the needs of businesses of all sizes and types.

Applications:

The Hanbu P8 Android Handheld POS System is designed and manufactured in Guangdong, making it a reliable and durable device that is built to last. It is also CE and ROHS certified, ensuring that it meets high standards of quality and safety.

One of the standout features of the Hanbu P8 is its 58mm/80mm printer, which allows for fast and efficient printing of receipts and other important documents. This makes it an ideal choice for businesses that require a reliable and speedy POS solution.

The Hanbu P8 also features dual-band WiFi (2.4GHz/5GHz IEEE 802.11 a/b/g/n/ac), which ensures that it can connect to a variety of networks and devices. This makes it a versatile device that is perfect for use in a range of different settings.

The Hanbu P8 Android Handheld POS System also supports a range of different functions, including voice call, data, WiFi, Bluetooth, and GPS. This means that it can be used for a range of different applications, including inventory management, payment processing, and more.

The Hanbu P8 also boasts a large 5-inch screen, which makes it easy to navigate and use. Additionally, it features a 2D scanner that supports 1D and 2D codes scanning, making it an ideal choice for businesses that need to quickly and easily scan barcodes and other types of codes.

With a minimum order quantity of just 1 and a delivery time of 5-7 days, the Hanbu P8 Android Handheld POS System is a flexible and convenient solution for businesses that need a reliable and efficient POS system. Whether you run a small retail store or a large restaurant, the Hanbu P8 is the perfect choice for all of your POS needs.
