Product Description:

The Android POS Terminal boasts an 8-inch 800*1280 IPS screen resolution that provides clear and crisp visuals. This feature ensures that merchants can easily read the transaction details and customers can see the amount they need to pay.

With a built-in NFC card reader, transactions can be done in a breeze. Customers can easily tap their cards or mobile devices to make payments, while merchants can easily accept payments without the hassle of cash handling. The Android POS Terminal also comes with a TMS (terminal management system) that allows merchants to manage their payment terminals with ease. This feature helps in keeping track of the transactions, devices and accounts with minimal effort.

The Android POS Terminal also supports voice call, data, WIFI, Bluetooth, and GPS functions. This means that users can make calls, browse the internet, and manage their business operations all in one device. The Bluetooth and WIFI functions allow you to connect to other devices and networks for seamless business transactions. With GPS, you can easily track your business locations and transactions. Additionally, the Android POS Terminal comes with a 58mm/80mm printer that allows you to print receipts on the spot. This feature is perfect for businesses that require a physical copy of the transaction details. The printer is fast and reliable, ensuring that you can print receipts quickly and efficiently.

In summary, the Android POS Terminal is a compact, handheld, and efficient cash POS machine that's perfect for small to medium-sized businesses. With its 8-inch 800*1280 IPS screen resolution, built-in NFC card reader, TMS, and support functions like voice call, data, WIFI, Bluetooth, and GPS, this device is an all-in-one solution for businesses. The 58mm/80mm printer makes it easier to issue receipts, ensuring that the transactions are processed smoothly and efficiently. Get the Android POS Terminal today and take your business to the next level!
