Product Description:

The Capacitive Five-Point Touch screen allows for smooth and easy navigation, ensuring that transactions are processed quickly and efficiently. This is complemented by the 8 inch 800*1280 IPS resolution, making it easy for you to view and manage all your business operations on one screen.

In addition to its impressive display, our Android POS product also supports a range of functions, including voice call, data, WIFI, Bluetooth, and GPS. This ensures that you can stay connected and manage your business operations on-the-go, no matter where you are.

With its 2D scanner support for 1D and 2D codes scanning, you can easily scan barcodes and QR codes for inventory management and other transactions. And with the added feature of TMS (Terminal Management System), you can remotely manage and update all your Android POS terminals from one central location.

In conclusion, the Android Smart POS Terminal is the perfect solution for businesses looking for a big screen Android POS system. With its impressive display, range of functions, and powerful features, this Android POS product will help you streamline your business operations and improve overall efficiency.
