## Product Description

### Product Description:

This Payment Terminal is designed to make payment processing quick and seamless. With its 1D/2D Bar Code Scanner (CMOS), customers can easily scan barcodes to make payments, saving time and reducing errors. The scanner is fast and reliable, ensuring that transactions are processed quickly and accurately.

Our Payment Terminal also comes with a 2.4G 802.11 B/g/n WIFI Module, allowing users to connect to the internet for seamless payment processing. This module is fast and reliable, ensuring that transactions are processed quickly and without interruption. With the USB Type-C USB2.0 (OTG), users can easily connect to external devices such as printers, scanners, and other peripherals.

Our Payment Terminal is an all-in-one solution that is perfect for small businesses, retail stores, and restaurants. It is user-friendly and easy to operate, allowing users to process payments quickly and efficiently. The touch screen interface is intuitive and easy to navigate, making it easy for users to learn and use.

Overall, our Payment Terminal is an excellent investment for businesses looking to streamline their payment processing. It is fast, reliable, and easy to use, making it an ideal solution for businesses of all sizes. If you are looking for a high-quality Payment Terminal that is packed with features, look no further than our Touch Screen Pos System!
