## Product Description

### Product Description:

The POS machine comes with two SIM slots and one type-C USB port, which makes it easy to connect to a variety of devices. The 11-inch LCD screen is large and easy to read, making it perfect for busy retail environments. The microphone is also supported, which allows for easy voice commands and communication with customers.

The Type-C USB2.0 (OTG) port allows for easy connectivity to a range of devices, including smartphones and tablets. This makes it easy to connect to a variety of payment systems and apps, making it an ideal choice for businesses that require flexibility in their payment processing.

The 1D/2D bar code scanner is a CMOS scanner that is perfect for scanning a range of bar codes quickly and accurately. This makes it easy to process payments and check inventory levels, which can save businesses time and money.

The Payment Terminal is an all-in-one touch POS machine that is perfect for businesses that require fast and efficient payment processing. With its range of features and connectivity options, it is an ideal choice for businesses that require flexibility in their payment processing. Whether you are running a small retail store or a large restaurant, the Payment Terminal is the perfect choice for all your payment processing needs.

### Applications:

The Hanbu P11 is a high-quality product that is made in GUANGDONG and is certified by both CE and ROHS. It is available for purchase in quantities as low as one, and has a delivery time of 5-7 days. The POS system has SIM card bands for both European and American brands, making it a versatile choice for businesses that operate in different regions.

One of the standout features of the Hanbu P11 is its Bluetooth support, which allows for easy connectivity with other devices. Another optional feature is the second small LCD screen, which can be used to display additional information to customers. Additionally, the P11 can be equipped with a fingerprint collection module for added security.

When it comes to scanning, the Hanbu P11 is equipped with a 1D/2D bar code scanner that uses CMOS technology. This makes it easy to scan bar codes quickly and accurately, which is essential for businesses that need to keep their transactions moving.

The Hanbu P11 is perfect for a variety of occasions and scenarios. For example, it can be used in retail settings to speed up transactions and improve customer service. It can also be used in restaurants to take orders and process payments quickly and efficiently.

Additionally, the P11 is a great choice for businesses that operate in multiple locations, as it can be easily moved from one place to another.

In conclusion, the Hanbu P11 is a touch screen POS system that is perfect for businesses looking to improve their transactions and customer service. With its Bluetooth support, optional second LCD screen, and fingerprint collection module, the P11 is a versatile and secure choice for businesses of all sizes. So why wait? Order your Hanbu P11 today and start reaping the benefits of a high-quality POS system!
