Product Description

Product Description:

This Android POS system also comes with a 2D scanner that supports 1D and 2D codes scanning, making it easy to scan barcodes and other types of codes. This feature is essential for businesses that need to track inventory or scan products at the point of sale.

The 8 inch 800*1280 IPS resolution display is clear and easy to read, making it perfect for businesses that need to show customers their orders or product information. The touch screen is also very responsive, making it easy to navigate through menus and options.

The 3GB or 4GB of RAM ensures that the Android POS product runs smoothly and efficiently, even with multiple apps running at once.

This is essential for businesses that need to process orders quickly and without any delays.

The Android POS product also comes with TMS (Terminal Management System), which allows businesses to manage and update their terminals remotely. This feature is essential for businesses that have multiple POS systems and need to ensure that they are all running the same software and updates.

In summary, the Android POS product is an all-in-one touch POS system that is perfect for businesses that need a reliable and efficient cash POS machine. With its Android system, 2D scanner, 8 inch IPS display, and 3GB or 4GB of RAM, it has everything you need to run your business smoothly and efficiently. The TMS feature also makes it easy to manage and update your terminals remotely, ensuring that your business is always up to date.

Applications:

With a minimum order quantity of just one unit and a delivery time of 5-7 days, you can get started with your new POS system in no time. And with a lead time of just 5-10 working days, you can rest assured that you'll have the support you need when you need it. The Hanbu P8 features an 8-inch 800*1280 IPS display, providing a clear and vibrant view of your sales data and other important information. And with its capacitive five-point touch screen, you can quickly and easily navigate through menus and enter data with just a few taps.

But that's just the beginning. The Hanbu P8 also comes equipped with a Terminal Management System (TMS), which allows you to manage multiple POS devices from a single location. This makes it easy to track sales, inventory, and other important data across your entire business.

And with 3GB or 4GB of RAM, the Hanbu P8 is more than capable of handling even the most demanding POS applications. Whether you're running a small retail shop or a busy restaurant, this handheld POS machine has the power and performance you need to keep your business running smoothly.

So if you're looking for a powerful, reliable, and easy-to-use POS system that can help you take your business to the next level, look no further than the Hanbu P8 Android POS Machine. Contact us today to learn more!

Packing and Shipping:

Product Packaging:

The Android POS product will be carefully packed in a sturdy cardboard box with appropriate cushioning to ensure that it arrives at its destination in pristine condition.

Shipping:

We offer free shipping for the Android POS product within the United States. Shipping outside the US will incur an additional fee, which will be calculated at checkout. We use reputable carriers such as FedEx, UPS, and DHL to ensure fast and reliable delivery. Delivery times may vary depending on the destination, but we strive to ship all orders within 1-2 business days.
