Product Description

Product Description:

The terminal management system (TMS) feature of this Android POS product allows businesses to manage and monitor their POS systems remotely. This means that you can easily update prices, add new products, and monitor transactions from a centralized location. This feature is perfect for businesses with multiple locations or those that require real-time updates on their sales and inventory.

The 2D scanner feature of this Android POS product allows businesses to scan various types of codes, including QR codes and barcodes. This feature makes it easy to add new products to the system, update prices, and track inventory levels. With the ability to scan both 1D and 2D codes, this POS system is versatile and can handle a variety of products and transactions.

The 8-inch screen size of this Android POS product is perfect for businesses that require a larger display for their menus and transactions. With a larger screen size, you can easily see all the details of your transactions, including the product name, price, and quantity. This feature makes it easy for both customers and employees to see what they are buying and selling.

This Android POS product has a lead time of 5-10 working days, which means that businesses can get their POS systems up and running quickly. With a fast lead time, businesses can start processing transactions and managing their sales and inventory in no time.

In conclusion, the Android POS Portable Handheld Terminal with TMS is an all-in-one POS system that is perfect for businesses that require mobility and versatility in their POS systems. With a 2D scanner that supports 1D and 2D code scanning, an 8-inch screen size, and a lead time of 5-10 working days, this product is the perfect solution for businesses that need an all-in-one POS system.

Applications:

The Hanbu P8 is perfect for a variety of product application occasions and scenarios. Firstly, it is ideal for retail businesses such as fashion boutiques, convenience stores, and supermarkets. The system is equipped with a card reader that supports NFC, allowing for quick and secure payments. This feature is perfect for businesses that require fast and efficient transactions, especially during peak hours. Additionally, the system's Google Play Store support provides a broad range of applications that can be used to manage inventory, customer data, and sales reports.

The Hanbu P8 is also perfect for the food and beverage industry, including restaurants, cafes, and bars. The system's capacitive five-point touch screen makes it easy to navigate menus, input orders, and make modifications on the fly. The tablet's 3GB/4GB RAM also ensures that multiple orders can be processed simultaneously without any lag or delay. The device's 3GB+16GB/4GB+64GB memory provides ample storage for menus, customer data, and sales reports.

The Hanbu P8 is certified by CE and ROHS, ensuring that it meets the necessary safety and quality standards. It is manufactured in Guangdong, a region known for producing high-quality electronics. The minimum order quantity for the product is one, making it accessible to small businesses that may not require large quantities of the device. The delivery time for the product is 5-7 days, ensuring that businesses can receive the product in a timely manner.

In conclusion, the Hanbu P8 is an ideal Android Tablet PC POS for small to medium-sized businesses in various industries. Its features, including the NFC card reader, Google Play Store support, capacitive five-point touch screen, and ample memory, make it a versatile and efficient system that can help businesses manage transactions, inventory, and sales reports. Its certifications and manufacturing location in Guangdong ensure that it meets the necessary safety and quality standards, while its minimum order quantity and delivery time make it accessible to small businesses.
