## Product Description

### Product Description:

One of the standout features of our Android POS system is the TMS (Terminal Management System). This allows you to manage all your terminals from one central location, making it easy to keep track of sales and inventory. With the TMS, you can monitor your transactions in real-time, view sales reports, and manage your inventory with ease.

The Android POS system also comes with a Capacitive Five-Point Touch Screen, making it easy to navigate and operate. The screen is 8 inches in size, with a resolution of 800 x 1280 IPS. The high resolution ensures that all your transactions are clear and easy to read, making it easy to keep track of your sales and inventory.

Another great feature of our Android POS system is the NFC card reader. This allows you to accept payments from customers using contactless payment methods such as Apple Pay and Google Pay. This feature is becoming increasingly popular with customers, making it essential for businesses to have an NFC card reader.

In addition to the main screen, our Android POS system also comes with a customer display. This display is 2.4 inches in size, with a resolution of 320 x 240. The customer display is perfect for showing customers their total purchase amount and other important information. This helps to improve the customer experience and ensures that customers are always kept informed.

The Android POS system is designed to be easy to use and operate. The Android operating system is intuitive and user-friendly, making it easy for employees to learn and use. The dual-screen design ensures that both the employee and customer have a clear view of the transaction, making it easy to confirm the purchase amount and other details.

Overall, our Android POS system is the perfect tool for businesses looking to improve their sales and inventory management. With the TMS, Capacitive Five-Point Touch Screen, NFC card reader, and customer display, this product has everything you need to run your business smoothly. Order now and experience the convenience of our Android POS system.

## Applications:

---

The Hanbu P8 is an Android Handheld POS Terminal that is perfect for businesses that need a portable and reliable POS system. Its lightweight and compact design make it easy to use and carry, and the 2.4 Inch 320\*240 customer display allows customers to see their transaction information easily.

The Hanbu P8 is a CE and ROHS certified product that is made in GUANGDONG. It has a minimum order quantity of 1, and delivery time is only 5-7 days. The P8 comes in two different memory options: 3GB+16GB or 4GB+64GB, and it supports functions such as voice call, data, WIFI, Bluetooth, and GPS.

This 8 inch pos pc is perfect for businesses such as retail stores, restaurants, cafes, and more. Its large display allows for easy viewing of products and transaction details, while its portability makes it perfect for businesses that need to move around.

The Hanbu P8 is also great for businesses that need to have a mobile POS system, such as food trucks or pop-up shops. Its reliable performance ensures that transactions can be processed quickly and efficiently, while its 3GB/4GB of RAM allows it to handle multiple tasks at once.

In conclusion, the Hanbu P8 Android POS product is a versatile and reliable POS system that is perfect for a wide range of businesses and industries. Whether you need a stationary or mobile POS system, the P8 offers everything you need to process transactions quickly and efficiently.
